Subject **Full Certification for SIMCom SIM7070G Communication Module, first certified release**

Dear SIMCom Team,

Deutsche Telekom issues a full **certification** for your **SIM7070G** communication module for NB-IoT, LTE-M, and EGPRS:

Concept Class	Power-optimized, multimode NB-IoT / LTE-M / 2G module
Deutsche Telekom (DT) Certification Date	22.03.2021
DT Responsible Entity / Contact	ITS-IVA / Miguel Rodriguez
Certified Deutsche Telekom Affiliates*	**NB-IoT / 2G:** AT, CZ, DE, HR, NL, PL, SK **LTE-M:** AT, DE, NL
OEM Firmware Version	1951B08SIM7070
OEM Hardware Version	V1.03

* Please refer to the OEM Certification Report for Deutsche Telekom Affiliate Country Codes

A full technical certification is granted by Deutsche Telekom. For more details, please refer to the OEM Certification Report of this product.

Although this product is granted a full technical certification, Deutsche Telekom will continue to restrict deployment of this product for Deutsche Telekom IoT projects having large volumes, as there is no support on this product for:

- No-harm to network / communication efficiency features (e.g. GSMA TS.34, due to application-side risks to Deutsche Telekom IoT connectivity and service layer platforms).

Best Regards,

Deutsche Telekom AG
